

DEMO AREA PURPOSE

Our Demo Areas have been set up to allow for the production community to test out the Toolkit and enhance their understanding and confidence, before using the tool on a production. This allows users to explore features at their own pace and familiarize themselves with workflows, which will lead to more efficient use during real productions.

Please Note:

In order to ensure our industry data remains clean (and does not include test data) we will not assess Carbon Footprints or Carbon Action Plans submitted from the Demo Areas. If you do accidentally submit for audit, the auditing team will set the status back to 'in progress'.

Other toolkit users within the Demo Areas will not be able to see your test productions or data, unless they are assigned to that specific test production.

ACCESSING THE DEMO AREA

Existing Toolkit User	If you are an existing user of our toolkit and would like to be granted access to a Demo Area please contact albert@bafta.org with the name of the demo area you require. Please see list below.
New Toolkit User	<p>Please apply for an account at:</p> <ol style="list-style-type: none"> 1. Log in (wearealbert.org) 2. Under 'Please choose a company' type in Demo 3. Select the demo area you would like access too. 4. The team will set up your account within 3 working days and send further instructions by email. <p>Please ensure you <i>do not select a Demo Broadcaster</i> account as access will be denied.</p>
Students	Access to the Demo Areas cannot be granted as a student. Kindly reach out to your tutor directly, as they oversee account management and administration on the student toolkit. Please keep in mind that your institution must be a part of the albert Education Partnership to access the student toolkit.

SETTING UP YOUR DEMO PRODUCTION

Once you have been granted access to the Demo Area you can create a production.

When selecting Production Company and Broadcaster details please use the most appropriate ones from the list below.

Please Note:

In order to ensure our industry data remains clean (and does not include test data) **we will not assess Carbon Footprints or Carbon Action Plans** submitted from the Demo Areas.

If you do accidentally submit for audit, the auditing team will set the status back to 'in progress'.

Other toolkit users within the Demo Areas will not be able to see your test productions or data, unless they are assigned to that specific test production.
